Pursuant to the ACT TO AMEND TITLE 26 OF THE DELAWARE CODE RELATING TO DELAWARE'S RENEWABLE ENERGY PORTFOLIO STANDARDS AND DELAWARE-MANUFACTURED FUEL CELLS ("the Delaware Fuel Cell Amendments"), as enacted on July 7, 2011, Delmarva Power & Light Company ("Delmarva" or "the Company") filed an Application with the Delaware Public Service Commission (the "Commission") on August 19, 2011.

The Application requests approval of the proposed electric tariff for a new Qualified Fuel Cell Provider Project - Renewable Capable ("QFCP-RC") service classification, by which Delmarva will collect charges to be applied to all of its customer classes on a monthly basis for qualified fuel cell projects. The Application also requests approval of the proposed natural gas tariff for a new Large Volume Gas ("LVG-QFCP-RC") service classification, which shall be applicable to qualified fuel cell projects, and approval of the form of service application and agreement entered into by the Company for a qualified fuel cell project.

Through this Application, Delmarva seeks to implement a comprehensive "economic development opportunity" within the

meaning of the Delaware Fuel Cell Amendments, and fulfill a portion of its renewable portfolio standards with energy produced by Bloom Energy Corporation's fuel cells. Bloom Energy Corporation intends to open a manufacturing and testing facility in Newark, Delaware.
