Re: PSC Docket No. 12-546 - Delmarva Power & Light Company
Gas Base Rate Case Compliance Filing for IMU Phase-In Rates
Effective July 1, 2014

Dear Ms. Bentley:

Attached please find the compliance filing of Delmarva Power & Light Company (Delmarva or Company) in Docket No. 12-546, for purposes of implementing the IMU Phase-In rate changes that will become effective on July 1, 2014. This filing is being submitted in compliance with the terms and conditions of the Settlement Agreement approved by the Public Service Commission in Order No. 8465 in this Docket. In support of this compliance filing, included are several attachments, as follows:

- Attachment A: consists of the workpapers that identify the revenue requirement associated with the AMI Regulatory Asset Balance to be put into rates effective July 1, 2014, pursuant to the provisions of Section II.C.2.a. of the Settlement Agreement (\$447,629);
- Attachment B: consists of the rate design workpapers to implement the \$447,629 revenue requirement outlined in Attachment A;
- Attachment C: consists of the compliance tariffs which implement the total revenue requirement to become effective July 1, 2014;
- Attachment D: consists of billing comparisons that detail the impacts of the July 1, 2014 rates;
- Attachment E: consists of the documentation supporting the capabilities associated with the July 1, 2014 Phase-In date as outlined in Sections II. C. 3 through 5 of the Settlement Agreement.

As demonstrated by the documentation provided in Attachment E, Delmarva has met the requirements as outlined in the Settlement Agreement. Section II. C.4. of the Settlement Agreement requires that this filing be made 105 days before each phase in date, which, for the July 1, 2014 phase in date, is March 18, 2014.

As always, should you have any questions or require any further information, please feel free to contact either me (302-429-3413) or Heather Hall (302-454-4828) at your convenience.

Respectfully submitted,

Pamela J. Scott

AMI/IMU REGULATORY ASSET RECOVERY

Background:

In Order No. 8265, the Commission approved a comprehensive proposed settlement agreement of Docket No. 12-546 (the "Settlement"). The Settlement approved by the Commission included, *inter alia*, the following provision in Section II. C. 2. a.:

- a. *The Parties agree to a phase-in of the recovery of the IMU Asset into customer rates (the "Phase-In") as follows;*
 - i. *50% of the IMU Asset will be put into rates on May 1, 2014,*
 - ii. *The remainder of the IMU Asset will be put into in rates on March 1, 2015, and*

(Settlement at page 6).

Delmarva did not meet the requirements to phase in the rates on May 1, 2014. However, the Settlement approved by the Commission provided in Section II. C. 6. that:

6. If the requirements for the portion of the Phase-In intended for May 1, 2014 are not met by the Company, then:

- a. *The portion of the Phase-In originally scheduled to occur on that date will be postponed until such time as the Company meets the requirements (as set forth above) to phase in rates on that date, and*

(Settlement at page 8).

The Company is making this filing at least 105 days prior to the phase-in date for 50% of the IMU Regulatory Asset to be implemented in rates on July 1, 2014, per Sections II. C. 2. a. and II. C. 6. of the Settlement. The Settlement provides that for a period of at least 90 days prior to the applicable dates, 95% of eligible meters must have been equipped with an activated IMU device and those IMU devices are functioning as planned. The filings for each portion of the Phase-In must be made at least 105 days prior to each phase-in date set forth above and include at least one of the following months: November, December, January, February, March and April. This document serves to confirm that, as of February 28, 2014, at least 95% (95.38%) of eligible meters have been equipped with an activated IMU device. The following table provides details.

Demonstration that 95% of the IMUs have been installed and activated:

As of February 28, 2014 (Note 1)

Total Gas Meters	131,655
Number of Ineligible/ Inaccessible Meters	6,804
Total Gas Meters Eligible for IMU	124,851
Threshold Needed to meet 95% of Eligible Meters with IMUs Installed and Activated	118,608
Actual Number of IMUs Installed and Activated	119,079
Actual % of Installed and Activated Eligible Gas Meters	95.38%
Number of IMUs Installed and Activated (119,079) as Correlated to the Number of Customer Accounts	118,386

Below, is a breakdown of the 6,804 gas meters which Delmarva has found to be ineligible or inaccessible. For this population of gas meters, the Company has not been able to install an IMU device, despite multiple attempts to contact the customers at these premises, due to external forces outside the reasonable control of the Company.

As of February 28, 2014 (Note 1)

Inaccessible/Ineligible Description	Number
Blocked Meters: The gas meter is physically blocked and Delmarva is unable to attach an IMU.	1,003
Periodic Testing Work No Response (PT): The gas meters were identified for the 2013 PT program. Delmarva has attempted to gain access to exchange the meter with a new meter with an IMU with no success.	776
Meter Access: The gas meters are not accessible, i.e. locked gate, inside home, etc.	2,567
Vacant: The gas meter is attached to a premise that was vacant at the time of the attempted install at the premise	164
Customer Refused: The customer refused the IMU installation at the time of the visits	90
No Response: The customer has not responded to any field visits, phone calls or letters.	70
Miscellaneous: Vicious dog at premises, unsanitary, unsafe, etc.	71
Inactive Acct: The account is inactive, however, it has a gas meter installed and Delmarva has not been able to gain access to install an IMU. (these are separated because they do not fall in other categories)	445
Rotary Meters: Commercial account, IMU currently in development	1,416
Dedicated Phone Meters: Commercial account, IMU currently in development	202
	6,804

Demonstration that 95% of the IMUs are functioning as planned and that those IMUs are 99.5% accurate and timely:

Per the Settlement in Section II. C. 5.:

The IMUs will be considered “functioning as planned” if 95% of the IMU devices have been sending remote readings that are being used for billing purposes and those readings are both 99.5% accurate and 99.5% timely.

The information below demonstrates that the IMUs are functioning as planned in that 95% of the IMU devices have been sending remote readings that are being used for billing purposes.

As of February 28, 2014 (Note 2)

Number of IMUs Installed and Activated (119,079) as Correlated to the Number of Customer Accounts	118,386
Threshold Needed to meet 95% sending remote readings used for billing purposes	112,467
Actual Number of IMUs sending remote readings used for billing purposes	114,801
Actual % of IMUs sending remote readings used for billing purposes	96.97%

In February 2014, 114,801 out of the eligible 118,386 gas accounts had IMUs that were activated for billing purposes. This percentage equates to 96.97%, and meets the requirements of the Settlement.

The chart below shows the timeliness and accuracy tracking for the month of February 2014. The Settlement states that “the accuracy rate of 99.5% will be considered achieved if no more than 0.5% of the bills require adjustment after the bill has been presented for payment to the customer.” In February 2014, the Company achieved an accuracy rate of 99.5%. In addition, the Settlement states that the “timeliness rate of 99.5% will be considered achieved if no more than 0.5% of bills are sent later than three full business days after the final reading within each customer’s monthly billing period.” In February 2014, the Company achieved a timeliness rate of 100%.

For the Billing Month of February 2014 (Note 2)

Total Accounts that has IMUs that were used for Billing Purposes	114,801
Accuracy Metric:	
Total Number of Bills with an IMU that were estimated (Note 3)	509
Total Number of Bills with an IMU that were corrected after presentation to the customer (Note 4)	61
Total Number of Bills (estimated and corrected = 509 + 61)	570
Total Number of Bills with an IMU reading not estimated or corrected after presentation to the customer	114,231
Actual % of Bills Meeting Accuracy Requirement	99.50%
Timeliness Metric:	
Total Number of Bills sent within the 3 day window	114,801
Actual % of Bills Meeting Timeliness Requirement	100.00%

Attachment E

For the month of February, the Company has achieved the accuracy and timeliness requirements as stated in the Settlement. As it has met the requirements for accuracy and timeliness for February 2014, the Company will demonstrate that it has met the requirements in the Settlement for 90 days prior to rate being implemented on July 1, 2014, and as such, is entitled to recovery of 50% of the IMU Regulatory Asset.

Notes:

- (1) The figures in this table represent the number of meters unless otherwise noted.
- (2) The figures in this table represent the number of accounts as billed through C3.
- (3) These accounts in the estimated category may be a result of a correction to a prior months bill.
- (4) If any of these accounts that were corrected were due to an estimated reading (61), they may have also counted in the category of accounts that were estimated and therefore are double counted.
